CORAL series

Amazing Sound!

Coral F-120

Colors explode across coral reef, what inspired our designers and engineers to create the CORAL speaker series. Like reef our speakers explode with thousands of tones, and take you for an enjoyable and luxurious journey to the land of audiophile music.

Coral SW-10 - active subwoofer

The **THAW (Taga High Amplitude Woofer)** bass driver offers extended cone excursion, which results in increased speed and range. The bass is fast, strong, low and dynamic.

The **THCA (Taga High Current Amplifier)** built-in amplifier offers huge amounts of raw power, and oversized, high-performance heatsink quickly dissipates generated heat, increasing efficiency and range of amplifier.

The beautifully crafted enclosures in luxurious wood veneer or elegant high gloss finishes, groundbreaking technology and advanced developments.

The 2nd generation **TPTTD-I (Taga Pure Titanium Tweeter Dome)** tweeter and the **TPAF (Taga Pure Aluminum Faceplate)** same as used in our flagship Platinum SE series.

The new high-end 6.5" **TPACD (Taga Pure Aluminum Cone Driver)** midrange reproduces very natural and detailed sound of vocals and instruments.

The new **TRSCD (Taga Reinforced Straw Cone Driver)** bass or bass / midrange is ultra-light and rigid at the same time. It delivers the quantity of extremely deep, accurate bass as well as presents superior neutrality and resolution of mid frequencies.

Coral F-120 - floorstanding speaker

The flagship Coral series speaker – the Coral F-120 is a splendid 3.5-way floorstanding speaker with one of the woofers located on the bottom rear of its cabinet. It was designed and engineered to generate high power and to build musical scene necessary to fill larger rooms with remarkable sound.

It has been achieved thanks to:

- Adding the extra high-end **TRSCD (Taga Reinforced Straw Cone Driver)** woofer located on the bottom rear of its cabinet and working in a separate chamber.
- Significantly increasing internal volume of the speaker's cabinet (now it is 5cm taller and 7cm deeper than the smaller Coral F-80).
- Increasing thickness of cabinet's walls (18mm for all walls comparing to 15mm in the Coral F-80, and 25mm to 18mm for the front baffle respectively).
- Serious redesign of the crossover.

The result is awe-inspiring sound - very natural, clean, coloration-free and rich sound of vocals and instruments as well as extremely deep and accurate bass.
